5.3 Attachment Service

For this scenario the attachment service can be called once for each of the declared applications/supporting documents. Once for the lease and one for the evidence (Consent from mortgagee). The attachment Id should change to match the corresponding application/document.

Attachment request using a supported file

```

Once the application has been processed a poll request for the completed application can be made. For the test stubs this has already been processed and so the poll can be completed at anytime. For the live service it will be expected that the outstanding request service will be used to confirm if a response has been generated, and ready for collection.
